

GRASS PITCH PREPARATION SPECIFICATION

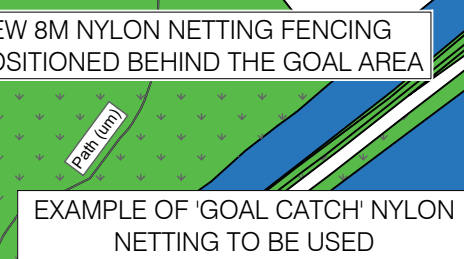

Stage	Task	Description
1	Selective Herbicide	This is to remove all the none wanted species which will allow the grass to spread and thicken up.
2	Cut and Scarification	This will remove all the thatch and dead grass from the base the pitch to allow for better water penetration and for better application of the fertilizer
3	Top Dressing	This will be a 70/30 mix that will be spread across the pitch surface to help for better drainage and to help level the pitch and for the new seed to bed in.
4	Preseed Fertilisation	This is to help establish the planted seed and to help thicken up the existing grass.
5	Over Seeding	This will be a R14c creeping rye grass. Which will be over seeded across the whole pitch
6	Verti Draining	This will be done twice a year once in the autumn and then the spring.
After Care		This will be done as per the contact specification the grass will be cut on the weekly basis at a height of 45mm and the pitch will be marked on a weekly basis. Additional care such as slitting and harrow every other week during the football seasons will also be carried out. After the season, repair works around the goal mouths and any other areas of the pitch that require it.
