

Margaret Barnard.

WBC LPR Regulations 19 Objections"

Traffic.

Putting in a exit at the north of the site into Hartshill is really crazy. it is already dangerous narrow road with several blind bends. Building these houses could create an extra 3,000 cars. Hartshill could not cope with it. So dangerous for children going to school cyclists & walkers. as we have no footpath. Not to mention the pollution from extra traffic.

Car Park.

What is the point in a car park all available ground will be built on. There will be where to walk to.

Healthcare.

On average people wait 2 weeks for a appointment to see a G.P. with Surgery's full to capacity. We also have a shortage of Dentists.

Hospitals have no spare beds with patients having to wait in Ambulance or corridors. How in the future with so many new houses. do you expect people to be treated. Even 1500 houses that would create on average 6000 patients. Young Families moving in would need Maternity facilities

Education.

In the plans schools are only Vagley mentioned. Have the planners not considered the Education for Future generations. Plans for Nursery, Junior - Secondary need to be in place before houses built.

Children need green areas to play for mental & physical health.

Infrastructure.

A big concern is for utilities they have trouble to cope now every corner you turn on your journey road is either closed or being dug up with burst water mains and roads flooded.

HE Bamard.
