Hi Vivian,

We have not yet concluded the S106 agreement at Outline stage, however we are making good progress with site investigations and utilities enquiries etc. We will be able to progress with reserved matters shortly following the completion of the S106 agreement.

With Kind Regards,

Cole Bates

Dear Vivian

As far as we are aware, although this is yet to be confirmed 100% by the Planning Inspectorate, is that no challenge has been lodged against the decision following the end of the JR period, such that the appeal decision now stands. In which case, we will soon be beginning the conditions discharge process and exercising the option to purchase the site from the landowners, and start the CIL process

That being said, its unlikely that we would start on site before the end of 2025 at the earliest.

Kind regards

Richard

Site Promotion Activity: Summary

The applicant has engaged in pre-application discussions with the Local Planning Authority (preapplication references: 20/00093/PREAPP and 24/01188/PREAIP). These have confirmed that the site is currently allocated within the Housing Site Allocations Development Plan Document (HSA DPD May 2017) so the principle of development is in accordance with Policy HSA19 and acceptable in policy terms. The pre-application responses have recognised that further design work, to finalise an appropriate layout (and establish a sustainable number of units) in line with the Local Planning Authority's feedback, is needed. In response to this, the applicant is currently undertaking further design work / due diligence to revise the proposals. This is in order to front-load any requirements, to ensure the planning application process is straightforward – this underpins the applicant's aspiration to achieve a timely, favourable determination and commence development on the site to deliver much-needed residential development.

During the former pre-application process, a positive response was also received from West Berkshire Council's Highways department. This response posed no objections in principle to the development proposals and recognised the allocated, thus acceptable-in-principle, nature of the site. Similarly, the Highways Department supported the provision of two access points serving the development. In this way, the acceptable nature of the site from a highways perspective, is evident. Whilst recognising that the quantum of development sought by the applicant is larger than the quantum of units allocated for development in the HSA DPD (May 2017), it must be noted that no objections have been raised by the Highways Department on unit numbers. As opposed to objecting the Highway Department recommended the preparation of documentation to support a formal planning application (including a Transport Assessment, Travel Plan etc) to inform and justify the proposals.

In light of the positive feedback received from both the Local Planning Authority and the Highways Department, demonstrating the readily available nature of the site and its lack of constraints, the applicant is working on a scheme to take into account the comments received during the pre-application exercises. This work, which will be finalised imminently, will be incorporated into the layout submitted as part of the formal planning application. As the site is not subjected to planning constraints, and can readily accommodate residential development, the applicant is undertaking this substantial amount of work at this stage to front-load any planning requirement as much as possible. This is not only to ensure the robustness of the proposals but, ultimately, seeks to minimise delays in light of the unprecedented pressures Local Planning Authorities are experiencing.

The applicant is looking to submit a planning application imminently and commence work on site within the next year / as soon as planning permission is achieved. The sole issue to resolve is the capacity of, and yield of, the site (unit numbers).

3. Site achievability (please give details)	
Is the landowner still supportive of the development of the site?	Yes
Is the site owned by a developer?	Yes – Hygrove Holdings Ltd
Are you (or the landowner if being completed by the site promoter) looking to develop the site yourself?	Yes – Hygrove Holdings Ltd is looking to develop the site themselves
Is the site currently for sale or being marketed by a land agent?	No
Is there current interest from a developer?	Yes – Hygrove Holdings Ltd
Does a potential purchaser have an option agreement with the landowner dependent on the site gaining residential planning permissions?	N/a

4. What development progress has been made to date? If there has been no progress, please explain why and state when a start on the site is anticipated (please give details)

In light of the disruption caused by the pandemic, it is evident that the applicant's aspirations for the site have been somewhat delayed due to the unprecedented nature of the global events both the public and private sector have been subjected to. Notwithstanding this, as outlined in Section 2 (Planning Status) of this document, the applicant has spent time engaging in pre-application discussions with the Local Planning Authority.

Further delay has been caused by the emergence of the Nitrate issue; Engineers have been appointed to advise on the effect this will have on the site. A Nutrient Neutrality Assessment was submitted as part of the documentation to support pre application reference 24/01188/PREAIP.

It is, therefore, anticipated that a planning application will be submitted early in the New Year, and for development on site to begin within the next year, subject to a planning consent being issued.

5. Anticipated annual bu	uild out rates (in financial ye	ears)

	2038/39		
	2039/40		

	2040/41	
Beyond 2041		

6. Are there any issues that may influence the achievability, economic viability or timing of the development of this site? If so, could these impact on the anticipated annual build out rates as set out in Q5 above? Please give details

There are no issues affecting the achievability, economic viability or timing of the development of this site. The site is fully owned and controlled by the Developers who are committed to securing planning permission / developing the site and, crucially, have the funds to do so. Given the inherent financial viability of any scheme brought forward, the uncomplicated ownership position and the allocation of the site for residential development, the site benefits from realistic prospects of being delivered within the plan period.

As recognised in Section 4 (Development Progress) of this site, whilst the Covid-19 pandemic has not impacted on the delivery of this site, it is evident that delays have been experienced across both the public and private sector not least in obtaining a pre-application response from the Local Planning Authority (July 2020 and October 2024) to the formal enquiry submitted by the applicant (May 2020). These exercises, the aim of which was to obtain a steer from the Local Planning Authority regarding the principle of development on the site, took over three months respectively. Whilst completely understandable, in light of the circumstances, it is evident that these delays have impacted upon the applicant's timescales. As also stated the delivery of the site has been affected by the emergence of the Nitrate issue especially given the proximity of the river Lambourn. Whilst this will not impact on the viability of the site additional investigation and Engineering work has been required to ensure no adverse ecological impact.

For these reasons, to avoid being subjected to further delays, the applicant is now effectively front-loading a formal planning application submission to ensure all due diligence is undertaken and that the determination process can be as streamlined as possible in order to deliver much-needed new housing.

7. Have there been any changes in circumstances that may mean the site is no longer suitable for residential development? *Please give details*

No – the applicant is committed to delivering high-quality residential development on site and is finalising the layout for the formal planning application in the interest of best-practice and a favourable determination for the proposals.

8. Are you actively considering alternative types of development for the site? Please give details

No – the site is suited for housing, as allocated.

9. Do you have any additional comments to make regarding the planning application / site or the current housing market? Please give details

Overall, in light of the above, it is evident that the applicant is committed to working with the Local Planning Authority to deliver a comprehensive sustainable development, providing much-needed homes in West Berkshire. Ultimately, the site is suitable, available for development and considered to be in a sustainable location for residential development – this is demonstrated by the feedback received during the pre-application exercises, both by the Local Planning Authority and the Highways Department, and its current allocation in the HSA DPD (May 2017) which must be retained in the interest of residential delivery. It is not considered that the site has any constraints which could restrict development despite the ongoing effects of the Covid-19 pandemic and nitrate issue – instead, the applicant has utilised the delays experienced to engage in pre-application discussions, finalise a robust layout in line with the local planning authority's aspirations, and to (imminently) submit a formal planning application. This is in order to commence development on the site as soon as possible so that this viable site can make a meaningful contribution to West Berkshire in terms of housing provision as well as associated health, wellbeing and community benefits in line with local and national Planning Policy.

10. Additional comments

The site is suitable, available, viable and deliverable for much needed housing.

Subject: RE: RESPONSE REQUIRED - West Berkshire Council Five Year Housing Land Supply (Pirbright Institute Site, High Street, Compton)

Date: 23 January 2025 15:53:34

Attachments: <u>image002.png</u>

This is an EXTERNAL EMAIL. STOP. THINK before you CLICK links or OPEN attachments.

Hello Vivian,

Please find below our current programme for Pirbright Institute with the latest timetable forecasts.

- Demolition and remediation works were completed in December 2024
- Marketing to appoint a developer is due to commence late January / early February 2025 with a forecast to enter into a conditional sale contact by July 25
- The appointed Developer will be required to submit Reserved Matters by March 2026. Soft market testing had indicated that this disposal timeframe is achievable
- Determination of Reserved Matters by August 2026 maximum of 16 weeks (EIA required)
- Build out from 2027/28

I hope this helps.

Kind regards,

Neil Iredale

Planning and Enabling Manager, South West

The Housing and Regeneration Agency

We believe that affordable, quality homes in well-designed places are key to improving people's lives. We make this happen by using our powers, expertise, land, capital, and influence to bring both investment to communities and to get more quality homes built.

Please forward any Freedom of Information Requests to: infogov@homesengland.gov.uk

6. Are there any issues that may influence the achievability, economic viability or timing of the development of this site? If so, could these impact on the anticipated annual build out rates as set out in Q5 above? Please give details

Reserved Matters approval, currently being delayed due to Nitrate Neutrality issues within the River Lambourne SAC. Meeting with Planning Officer requested.

Biodiversity requirements / Timings

CIL rate

7. Have there been any changes in circumstances that may mean the site is no longer suitable for residential development? Please give details

Nο

8. Are you actively considering alternative types of development for the site? Please give details

No

9. Do you have any additional comments to make regarding the planning application / site or the current housing market? Please give details

An alternative solution to the Drainage issue was submitted to the Council in September 2024.

All other matters relating to the application are acceptable as confirmed by the Planning Officer.

The submitted solution dealt with the phosphates on site so that there was no increase in nitrates/phosphates going off site over that produced by the current situation (i.e. the undeveloped site). This application is thus held up due to the unwillingness of the councils' officers to review the proposals and make a decision.
